## SYSTEM ACCESSORIES

The most critical and time-consuming portion of a VersiGard® EPDM roofing installation can be made faster and easier when you use VersiGard Quick-Applied (QA) self-adhesive seaming and flashing products. VersiGard QA Accessories greatly reduce the time required for completing seams and installing flashing, which can reduce your labor costs. And because adhesive thickness is controlled in the factory, waste and total material costs are reduced as well.

Consistent high quality is achieved with VersiGard QA products. The adhesive application is uniform throughout the installation, and the ultimate adhesive strength of VersiGard QA accessories is achieved in a short period of time. Not only is installation time reduced, contractors are ensured the same high-quality installation across the roof.

VersiGard QA accessories are available in black for use with VersiGard Black EPDM membrane, and white for use with Versico's VersiGard White EPDM membrane.

**It all adds up to an unbeatable combination of quicker, longer-lasting and more profitable installations.**

**VersiGard QA Inside/Outside Corners** are a 90-mil-thick combination of QA Butyl adhesive and uncured VersiGard EPDM Flashing. The pre-cut corners yield a considerable reduction in installation time and can be used for inside and outside corner installations.  
Size available:  
Black and White 7" x 9"

**VersiGard QA Pipe Seals** have pre-applied adhesive on the bottom of the deck flange, which increases the speed and ease of installation. The need for extra tools is eliminated. The pre-applied adhesive ensures consistent coverage and a strong bond to the membrane.  
Sizes available:  
Black - 1/2"-3" and 1"-6"  
White - 1"-6"

**QA Walkway Pads** are Versico's standard molded walkpads with QA tape pre-applied to the underside of the pad. QA Walkway Pads are designed to protect the membrane in those areas exposed to repetitive foot traffic.

Versico recommends the QA Walkway Pads with all Versico roofing systems. The walkway pads are UV resistant, have excellent tear and puncture resistance and offer the roofing contractor a laborsaving installation alternative to the standard walkway pads.

Sizes available:  
Black and White 30" x 30"

**VersiGard QA Penetration Pockets**

consist of uncured VersiGard EPDM Flashing with cured EPDM/Butyl-based polymer adhesive backing and a 2" support strip pre-applied to the flashing. Sizes can be combined to form larger pockets when required. The QA Penetration Pockets are a labor- and cost-saving innovation, with easy installation as adhesive brushes are not necessary. Adhesive flash-off time is eliminated and the pre-applied adhesive ensures even contact with the substrate.  
Sizes available:  
Black - 4", 6" and 8" diameters  
White - 6" diameter

## SYSTEM ACCESSORIES

**VersiGard QA Seam Tape** is a two-sided, cured EPDM/Butyl-based polymer adhesive. VersiGard QA Seam Tape is a seaming alternative to Seam Adhesive for all VersiGard EPDM Roofing Systems.

Sizes available:  
Black and White  
3" wide x 100' long  
6" wide x 100' long

**VersiGard QA Cover Strip** is cured VersiGard EPDM laminated to the semi-cured EPDM/Butyl-based polymer adhesive, and is used primarily for gravel stop stripping. Its application is the same as VersiGard QA Flashing.

Sizes available:  
Black and White  
6" wide x 100' long rolls  
9" wide x 100' long rolls  
12" wide x 50' long rolls

**VersiGard QA RTS (Reinforced Termination Strip)**

speeds the installation by eliminating the application of seam adhesive, resulting in material reduction and labor savings. The 6"-wide product is made with cured reinforced EPDM membrane with 3"-wide QA Tape laminated to one side. The 9"-wide product has 3"-wide QA Tape laminated to each edge.

The 6" RTS is for use with all VersiGard Systems and the 9" RTS is for use with Mechanically Attached VersiGard Systems.

Sizes Available:  
Black - 6" wide x 100' long and 9" wide x 100' long rolls  
White - 6" wide x 100' long rolls

**VersiGard QA Flashing**

is uncured VersiGard EPDM laminated to a cured EPDM/Butyl-based polymer adhesive. QA Flashing can be used anywhere conventional uncured flashing is used – curbs, corners, pipes, gravel stop stripping and T-Joint covers. The application is similar to conventional detailing without the need for seam adhesive or lap sealant.

Sizes available:  
Black and White  
6" wide x 100' long rolls  
9" wide x 50' long rolls  
12" wide x 50' long rolls
